HEALTH & SAFETY TRAINING SOLUTIONS

Regardless of the size of the undertaking, it is important that you manage your health and safety in a proactive manner. To be proactive you must be fully informed of the relevant safety and health legislation. This course will train staff in the most up to date methods of managing health and safety in a creative learning environment. A combination of practical exercises, theory instruction, workshop formats using different multimedia's are used to instruct students in a positive workplace safety culture

HEALTH & SAFETY TRAINING BENEFITS

Training involves providing people with knowledge, and then giving them the opportunity to practice or use it. In other words it allows staff to become more skilled and therefore more productive. If workers are simply given the knowledge but not the chance to practice it, the learning process is incomplete.

PREFERRED ENTRY LEVEL

For students to participate in the course FETAC have stated in their Course Descriptor that students should have a FETAC Level 4, Leaving Certificate or equivalent qualifications and/or relevant life and work experiences

COURSE CODE

The FETAC Course Code for this Course is D20165

FURTHER INFORMATION

If you require further information please visit our website at www.emsandassociates.ie

COURSE DURATION

This course takes place over 3 days. Ideally 1 day a week for 3 weeks. 2 x Written Assignments must be completed by the final day of the course. This accounts for 60% of the total marks

COURSE ASSESSMENT

2 x Assignments = 60% and a Theory Based Examination = 40%.

All assessment is carried out in accordance with FETAC (NCVA) regulations. The Assessment is devised by the internal assessor, with external moderation by FETAC.

Please note that Students are advised of their final results after the final moderation by FETAC
